Dear Hiring Team,

I am writing to express my interest in the Solution Specialist – Artificial Intelligence at Sectra. With a strong background in Machine Learning, I am confident in my ability to make valuable contributions to your team.

I have a bachelor's degree in Computer Engineering from the University of Mumbai, and I am currently pursuing a master's degree in Computer Science with a concentration in Applied Artificial Intelligence from the University of Ottawa. I have been honing my computer science skills through various academic and professional opportunities. My experience working as an Assistant System Engineer at Tata Consultancy Services and working as a third-party employee for the Chief Data Office, at the Royal Bank of Canada has helped me grow as a professional, adapting to standard industrial practices. I worked with different stakeholders to develop data quality rules, data sources and DataStage job deployments. My key achievements here would be automating and optimizing the manual deployment life cycle to minimize deployment duration from 2 days to 2 hours. Additionally, I've developed a reputation for my organizational skills and the way I encourage teamwork among the engineers in my charge.

As a computer science student, I have been part of various academic projects involving deep learning algorithms for object detection, web development, natural language processing, etc. I am well-versed in various ML frameworks such as TensorFlow and have experience working with large datasets. Additionally, my experience in data analysis and programming has allowed me to develop strong problem-solving skills and the ability to communicate complex technical ideas to non-technical stakeholders. I have developed a strong understanding of software development processes and methodologies, and have honed my skills in a variety of programming languages including python, java, JavaScript, etc. I have also been able to apply these skills in various projects, from developing a website for a local small business, to contribute to a large-scale enterprise project.

I am excited about the opportunity to apply my skills and experience to help drive your company's success in the field of Machine Learning. Thank you for your time and consideration, and I look forward to the opportunity to speak with you further about my qualifications.

Sincerely,

Snehal Sudhir Bhole
